Kick-off Meeting

Second Project Meeting

SUMMARY:

Partner	1
Kick-off meeting	2
Second Project meeting	2

The ADRIARadNet Project

ADRIARadNet is the acronym for ADRIATIC integrated RADAR based and web oriented - information processing system NETWORK.

ADRIARadNet aims at creating an innovative forecasting system for the Adriatic areas to support interregional and international cooperation in the hydrometeorological field.

In these areas lowcost radar based infrastructures will be installed and integrated with existing precipitation sensor networks in order to be exploited within the ADRIARadNet project aims .

ADRIARadNet objective is to set up an integrated web-based scalable flexible-interoperable ICT infrastructure, based on

a network of lowcost weather radars and satellite data to be integrated with web-oriented geographic information systems, regionally-tuned numerical prediction models and decision support systems for civil prevention and protection within the Central and Southern Adriatic regions.

In summary theADRIARadNet project aims at covering the “last mile” between hydrometeorological community and regional governments which are in charge of civil prevention and protection. ■

Project Partner

The IPA Adriatic program of cross-border cooperation, which asserts ADRIARadNet project, includes the regions of Europe bordering the Adriatic Sea: Albania, Bosnia Erzegovina, Croatia, Greece, Italy, Montenegro, Serbia e Slovenia. The project brings together institutions and organizations from three countries (Italy,

Croatia and Albania) reaching a total of eight partner. Leading partner is the Center of Excellence CETEMPS of University of L’Aquila. The other beneficiaries are the Italian Direzione LL.PP e Protezione Civile (Civil Protection) - Centro Funzionale of the Abruzzo Region, la Protezione Civile - Centro

Funzionale of the Marche region and Beep Innovation Company. There are three Albanian partners: the Ministry of the Interior-Civil emergency, the Institute of Geosciences IGEWE and the Albanian branch of the Foundation CIMA of Savona. Croatia is represented by the Dubrovnik Region, Neretva. ■

Kick-off Meeting

ADRIARadNet kick-off Meeting, was held on Monday 26 and Tuesday, November 27 2012 at the Department of Physical and Chemical Sciences of the University of L'Aquila. CETEMPS and the Abruzzo Region - LL.PP. Direction, Integrated Water Soil and Coast Management,

Civil Protection considered appropriate to introduce the initial meeting of the project by a thematic conference, focused on the European context and the Adriatic application horizons. This session has set the dual aim of promoting scientific content and technical goals of the project

to a wider audience and not only "insiders" in order to stimulate critical thinking and promote the importance of project synergies between universities, government institutions and companies in the sector. ■

The prof. F. S. Marzano presented the project to the Conference at the Auditorium "Piervincenzo Gioia" in L'Aquila

Second Project Meeting

ADRIARadNet second Meeting was held in Tirana, on May 27, 2013, followed, on May 28, by the technical meeting. The event took place at the Ministry of the Interior, where the deputy Minister Ferdinand Poni met with of the project representatives. During the meeting, the Deputy Minister has appreciated the good cooperation between the partners of the different

Countries for the standardization of forecasting and monitoring procedures of the various natural manifestations of the Adriatic area. The meeting continued at the Institute of Geosciences, Energy, Water and Environment of the Polytechnic University of Tirana. The Meeting was attended by the Director General civil emergency, Alfred Olli, the IGEWE director prof. Marenglen

Gjonaj and the representatives of the various partners. On Tuesday, 28, the technical meeting analyzed the activities carried out highlighting the problems encountered and the actions to be implemented for the purposes of the project. ■

The project is co-funded by the European Union, Instrument for Pre-Accession Assistance

IPA Adriatic 2007-2013, the cross-border Cooperation Programme is the result of the joint programming performed by the concerned participating countries and it is part of the process of cooperation in the Adriatic. Several factors make this cooperation important from a political and economic point of view: factors related to the political stability of the area and factors related to geographical and cultural proximity which make possible the intensification of multilateral relations between the Adriatic coastal regions to support local processes of harmonious growth sustainable development and unity among peoples. ■
